How to download the newest Zoom changes

Upgrading the Zoom desktop client for Windows, macOS, or Linux

Zoom provides a pop-up notification when there is a new mandatory or optional update within 24 hours of logging in.

If you already have the Zoom desktop client installed, check for updates:

1. Sign in to Zoom desktop client.
2. Click your profile picture then click **Check for Updates**.

If there is a newer version, Zoom will download and install it.

Note: If the desktop client was installed with the MSI installer by you or your IT team, AutoUpdate is disabled by default and the **Check for Updates** button is also removed. Please contact your IT team or Zoom account admin for help with updating.

You can also manually download the latest version by:

- Clicking **download** from the link at <https://zoom.us>.
- Directly from one of the following links:
 - <https://zoom.us/support/download>
 - <https://zoom.us/download>
 - <https://zoom.us/download2>

Upgrading the Zoom mobile app for iOS or Android

Download the Zoom mobile app from Google Play or the Apple App Store.

Note: Zoom displays a mobile notification whenever there is a new update.
